# Practice Managers

- JellyPx is the most highly configurable system on the market so with expert help from our team, you will have a tailored software solution at a fraction of the cost of developing your own system.
- Automation of tasks such as appointment recalls and reminders, task lists, alerts and patient reports will ensure no patient slips through the net.
- Every detail about the patient is available instantly so whether the patient is on the phone or onsite, all queries can be answered accurately.
- With the capability to collate data to your own specification, tasks such as revalidation and reporting can be managed quickly. Bespoke patient, financial and business reports can be evaluated, exported and securely emailed to any third party.

# Reception

- Jelly's intuitive diary screen has everything needed to manage patient bookings, locations and payments. With just a few clicks it is easy to book complex care schedules or manage waiting lists.
- From check-in to payment, information is shared between reception and practitioner so the patient visit can be managed discreetly and waiting times kept to a minimum. By monitoring and reporting on patient visit times, bottlenecks can be identified and service improved.
- With Stripe and Opayo integrated into Jelly, online payments can be taken over the phone or onsite. Using saved credit card details, you can take payment without the patient being present.
- A dedicated message screen allows you to quickly read and respond to messages from patients and colleagues and assign tasks using the workflow system.

"Jelly is the only software that could truly manage everything we needed for our clinic. From fully tailored digital patient notes; secure patient communication through the patient portal; retail sales; prescriptions; Healthcode and Xero integration. Jelly has provided everything we needed in one easy-to-use software package. Jelly support is quick to respond and very helpful."

*Jon Clayton (Director),  
Derma Reading*

# Clinicians

- Simple navigation through a patient's medical history and secure data sharing with colleagues and patients. Clinicians only see the screens they need.
- Create your own specialist forms for use by clinicians or can be completed by patients at home or on any device.
- Templated notes, documents, diagrams, auto generation of GP letters are available.
- Built in dictation.
- Manage pathology, create digital prescriptions.
- Injectable's management for aesthetics and vaccinations.
- Provide travel vaccination services and flu clinics.
- Clinical coding using Snomed, CCSD and other coding schemes.
- Video consultations via Zoom, Attend Anywhere or Livi.

# Finance

- Handles complex billing requirements for companies, self-funders, families or insured patients. Will scale from individual invoicing up to large scale batch invoicing.
- Integrated with Healthcode for speedier insurer billing.
- Can generate quotations, orders, invoices or receipts.
- JellyPx handles all sorts of payment requirements such as professional and retail stock, courses, classes, promotions, vouchers, clinical and procedure fees.
- A comprehensive range of standard reports are available covering everything from cashing up to outstanding debts.
- Integrated with Stripe, Opayo and Xero.

# Patients

- Patient portal allows patients to view appointments, pay invoices and shortfalls, read their reference material, complete forms and review letters and results.
- Online booking can be embedded into your website and easily customized to offer patients a seamless online experience.
- It supports multiple locations, real time availability, sign ups, deposits or full amounts, offer discount codes and a full range of other features.
- Patients can be emailed forms to complete in advance automatically or sent all sorts of communications triggered by various tasks going on in Jelly.

# Security and Compliance

- JellyPx runs on servers hosted by Rackspace. They guarantee 100% up-time with the highest levels of security compliance with enterprise-grade data encryption at rest and in transit.
- The data centers are accredited to PCI DSS, ISO27001, and ISAE 3402 Type II standards.
- JellyPx has also achieved the government's own Cyber Essentials certification as well as being approved by the NHS.
- All actions by users in JellyPx are audited and they only have access to those facilities necessary for their role.
